                                                                                                                                                                                                                                                                                                                                                                                                                                                                Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Patent No. 5928893
GENERAL INFORMATION:
APPLICANT: KANG, Chang-Yuil
APPLICANT: KIM, Joong-Gon
ITILE OF INVENTION: MONOCLONAL ANTIBODY SPECIFIC FOR HUMAN
ITILE OF INVENTION: 4-1BB AND CELL LINE PRODUCING SAME
NUMBER OF SEQUENCES: 13
CORRESPONDENCE ADDRESS:
ADDRESSEE: KANG, Chang-Yuil
STREET: Professor Apt. Ka-302, #244-2, Bongchun 7-dong,
STREET: KWANAR-GU
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  .

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   C. Accession: S38565
R. Monestier, M.; Losman, L.J.; Novick, K.E.; Aris, J.P.
submitted to the EMBL Data Library, September 1993
A. Description: Molecular analysis of mercury-induced anti-nucleolar antibodies in H-2s ?
A. Reference number: S3859
A. Status: preliminary
C. Superfement: EMBL: X75100; NID: 914157; PIDN: CAA52991.1; PID: 9414158
C. Suberfementy: immunoglobulin V region; immunoglobulin homology
C. Keywords: heterotetramer; immunoglobulin
F:15-98/Domain: immunoglobulin homology < IMM>
